

The goal of the Collaborative is to leverage federal funds to strategically reduce emissions from the most polluting diesel sources in impacted communities. The Collaborative seeks to improve air quality and public health by targeting the highest polluting engines with the most cost effective control strategies.

DERA 2017: Public Works Vehicle & School Bus Replacements in Nevada

The West Coast Collaborative (WCC) is pleased to announce the Nevada Division of Environmental Protection's (NDEP's) receipt of a United States Environmental Protection Agency (US EPA) Diesel Emissions Reduction Act (DERA) State Clean Diesel Program grant to replace heavy-duty diesel vehicles operating throughout Nevada. This project will be implemented using \$348,002 in DERA grant funding combined with \$232,001 in matching funds from NDEP and \$1,740,008 in cost-share funds from participating fleets.

What is the Project?

This project will replace six Class 5-8 legacy diesel vehicles and six legacy diesel school buses with new vehicles powered by model year 2017, or newer engines. The older, replaced vehicles will be removed from service and permanently destroyed.

What are the environmental benefits?

Over the remaining lifetime of the 12 affected engines, these upgrades will reduce emissions of fine particulate matter (PM_{2.5}) by 0.16 tons, nitrogen oxides (NO_x) by 2.9 tons, hydrocarbons (HC) by 0.38 tons, and carbon monoxide (CO) by 1.1 tons. Reduction of PM_{2.5} emissions will also reduce black carbon (BC), which influences climate by directly absorbing light, reducing the reflectivity ("albedo") of snow and ice through deposition, and interacting with clouds.

Who are the Partners on this project?

The project will be led by NDEP, a state agency whose mission is to preserve and enhance the environment of Nevada in order to protect public health, sustain healthy ecosystems, and contribute to a vibrant economy. NDEP received the DERA grant award through the WCC, and will distribute grant funds to the participating fleets. NDEP is also responsible for managing and reporting results for the project.

What is the Collaborative?

The WCC is an ambitious partnership between leaders from federal, state, local and tribal governments, the private sector, and environmental groups committed to reducing diesel emissions along the West Coast. Partners come from all over Western North America, including: Alaska, Arizona, California, Hawaii, Idaho, Nevada, Oregon, Washington, the Pacific Islands, Canada and Mexico. The WCC is part of the US EPA National Clean Diesel Campaign.
